PROJECTS

GAS LEAKAGE DETECTION AND AUTOMATIC POWER CONTROL

- The aim of the project is to detect gas leakage and alert nearby peoples and trip the power supply using MCB.
- In this Project We used MQ2 sensor for detecting Gas,Buzzer that alerts people,SIM900A GSM Module for sending a SMS "Gas Leakage Detected" this module is backup for alert people through SMS. In case of user unavailability, to prevent an explosion the system provides an automatic door open by solenoid lock,motor drive and gear wheel and trip the power supply using MCB.
- This design prevents LPG gas leakage.

DEVELOPED A PORTFOLIO USING FRONTEND DEVELOPMENT

- This is My First Project to Develop a Portfolio Using Frontend tools.
- It is a Website which has all Information regarding Me.
- Technologies - HTML , CSS , JAVASCRIPT
